[Portfolio](#)

Software Engineering student with hands-on experience in full-stack development and SaaS applications. Skilled in building and maintaining RESTful APIs using Java, Spring Boot, React, Node.js, and SQL, with experience in data modeling, and scalable application design. Familiar with modern development practices including Git-based workflows, Agile (Scrum) methodologies, and debugging across real-world projects. Strong problem-solving skills and ability to translate technical requirements into reliable, user-focused solutions.

EDUCATION

Technical Degree in Internet IT | SENAC, São Leopoldo | FEB 2022 - DEC 2024

Bachelor in Software Engineer | UNILASALLE Canoas | JAN 2025 - PRESENT

EXPERIENCE

Software Developer Intern | Prolec, Canoas | JUNE 2025 - PRESENT

- Work on Agile software development tasks, including requirement analysis, feature implementation, and code reviews.
- Develop and maintain internal applications using C# and MudBlazor, improving stability through debugging and performance fixes.
- Engage with senior and global teams to troubleshoot and resolve product issues, contributing to faster and more reliable solutions.

Hackathon Tech+Saúde | SENAC, São Leopoldo | November 2024

- Winner of the Tech+Saúde Hackathon 2024, organized by SENAC RS in partnership with Unimed.
- Built a full-stack solution with Node.js and MySQL to track medical items, ensuring sanitary compliance and patient safety.

SKILLSET

Technical

- Java, JavaScript, Python, C#
- SQL (MySQL, PostgreSQL, SQLite)
- HTML, CSS, React
- Git, GitHub, GitLab
- Node.js
- MudBlazor

Analytical & Competencies

- Problem-solving and root cause analysis
- Debugging and system troubleshooting
- Analytical thinking and attention to detail
- Ability to translate business requirements into technical solutions
- Clear communication with technical and non-technical solutions
- Adaptability and continuous learning mindset
- Collaboration in Agile (Scrum) environments
- Portuguese (Native) / English (Fluent)

PROJECTS

Inventory ERP

- Built a full-stack ERP system using Java (Spring Boot) and React.
- Implemented business logic for stock validation and automated audit logs, inspired by S/4 HCM redesign principles.
- Applied design patterns and global exception handling to improve reliability and maintainability.

Finance Manager

- Developed a SaaS application for personal finance management using React (Vite), Node.js (Express), and MySQL.
- Implemented secure JWT authentication and logic for recurring payments, preventing duplicate transactions.
- Resolved production and cloud deployment issues, including CORS configuration and environment variable management.
- Built interactive dashboards and advanced filtering for monthly and yearly financial tracking.
